Title: I-95: Bridge St DESIGN

Improvement Type: Interchange Improvement

State Route: 95

Municipality: Philadelphia (CITY)

Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date:

Actual Construction Bid Date:

Location: CITY OF PHILADELPHIA

Project Description: This project provides for design of I-95 Reconstruction SR 0095 Section BSR, also known as the Bridge Street Ramps Section, and will eliminate the lane drop at the James St. Ramp in the southbound direction and will eliminate the add lane at the Bridge St Acceleration Ramp in the northbound direction. The proposed SR 0095 will have four lanes in each direction from Orthodox St. to Levick St. with exclusive acceleration/ deceleration lanes at the interchanges. The project will consist of six dual structures, and the Bridge Street Acceleration Ramp Bridge. All retaining walls supporting SR 0095 will be totally reconstructed to support the new widened roadway and ramps. In addition, the project consists of 1.7 miles of reconstruction and realignment along SR 0095, as well as 0.7 miles of reconstruction along Tacony Street from Aramingo Ave. to the west to just prior to Van Kirk St. to the east. Approximately 1.2 miles of reconstruction along Aramingo Ave. is anticipated from Frankford Creek to the south to the Amtrak Railroad Bridge to the north. A portion of Aramingo Ave. will also be widened from Orthodox St. to Tacony St. along the SR 0095 side of Aramingo Ave. The Aramingo Avenue/Betsy Ross Interchange will be reconfigured to realign the planned Adams Avenue Connector to intersect Aramingo Ave. adjacent to the Frankford Creek Bridge. Additional ramps will be constructed between the Betsy Ross Bridge and the SR 0095/Aramingo Ave Interchange to accommodate all traffic movements from the Betsy Ross Bridge and from SR 0095 (MPMS 79903 - SR00095, Sec BR0). These new ramps will serve to accommodate the increased traffic volumes from the removal of the two ramps at the Bridge St. Interchange. One of the ramps to be removed is a deceleration ramp from SR 0095 NB to Aramingo Ave. NB. The other ramp to be removed is an acceleration ramp from Aramingo Ave. SB to SR 0095 SB. The project also consists of relocating the SR 0095 SB deceleration ramp at the Bridge St. Interchange. The ramp is being moved farther north to allow the ramp to meet current design standards and tie into a new road called Relocated Carver Street which outlets vehicles onto Tacony Street. In addition this project will incorporate new traffic signals at 12 intersections and modifications to traffic signals at 5 intersections.

Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's annual memoranda on supplemental strategies for details related to this project.

This project is integral to the Delaware Valley Freight Corridors Initiative.

An investment of more than \$2 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, some which appear in the DVRPC Regional TIP, and most which will occur in Later Fiscal Years and are yet to be programmed. MPMS #'s include: 17821 (Section GIR Design: GR0, GR1, GR2, GR3, GR4, GR5), 47811 (Section BSR Design), 47812 (Section BRI Design), 79683 (Section CP1 Construction), 79685 (Section CP2 Construction), 79686 (Section GR1 Construction), 79903 (section BR0 Construction), 79908 (Section BS1 Construction), 83640 (Section GR2 Construction).

Project Description: This project provides for the design of I-95 Reconstruction SR 0095 Section BRI, also known as the Betsy Ross Interchange. Section consists of reconstructing 1.1 miles of the SR 0095 mainline roadway starting from south side of the Wheatshaf Lane crossing, adjoining Section AFC, and ending north of Orthodox Street at the south side of the Margaret Street/Lefevre Street crossing, adjoining Section BSR. The lane drops (from 3 to 4) on SR 0095 will be eliminated from the Betsy Ross Interchange crossing to the Margaret Street/Lefevre Street crossing. Within Section BRI, the NB and SB collector-distributor roads, the Ramp X SB on ramp and Ramp Y NB on ramp will be demolished and removed. The proposed SR 0095 mainline will have four lanes in each direction from Wheatshaf Lane to Orthodox Street/Pearce Street crossing. On the SR 0095 mainline, the project includes reconstruction of three dual structures (the dual structures over Frankford Creek; the dual viaduct structures over the Earth Fill area from the Betsy Ross Interchange to south of Orthodox Street crossing; and the dual structures over Orthodox and Pearce Streets). Section BRI includes the minor rehabilitation of the Conrail Shared Assets railroad bridges crossing SR 0095 and Ramps A and C.

In addition, the Aramingo Avenue/Betsy Ross Interchange will be reconfigured to realign the planned Adams Avenue Connector to intersect Aramingo Avenue adjacent to the Frankford Creek Bridge and to accommodate increased traffic volumes from the consolidation of the Bridge Street Interchange. In the Betsy Ross Interchange area, Section BRI also includes reconstruction of eleven connecting bridge structure ramps (Ramp A from SR 0095 NB to Betsy Ross Bridge; Ramp B from Betsy Ross Bridge to SR 0095 SB; Ramp C from SR 0095 NB to Aramingo Avenue; Ramp D from Adams Avenue Connector to SR 0095 SB; Ramp EE from SR 0095 SB to Betsy Ross Bridge; Ramp F from SR 0095 SB to Aramingo Avenue.

This project is funded by a portion of a \$51,254,972 TEA-21 Earmark (PA ID# 228/FED ID# 1847)

Location: I-95 in Bucks, Delaware, and Philadelphia counties

Project Description: This project will provide for Congestion Management Activities related to the reconstruction of I-95 through Bucks, Delaware, and Philadelphia counties, via a series of investments to enhance the capacity of the SEPTA regional rail lines parallel and closest to the I-95 corridor. This is to further the ongoing congestion mitigation as the construction activity increases on the corridor. Mainline work will expand on sections CP2 and GR2, to GR3, and GR4 to include the BSR/BRI and AFC sections in the near future. Actual effects of I-95 construction phasing is being monitored, and ridership is currently at capacity for the parallel regional rail. Enhancement of the capacity of SEPTA regional rail would be effective in relieving congestion construction zones. Improvements may include purchase of additional rolling stock; improvements for additional parking at regional rail stations; and yard, interlocking and storage improvements. Efforts may begin with the purchase of available rolling stock.
