

# **Lackawanna/Luzerne Transportation Study Metropolitan Planning Organization Annual Obligation Report Federal Fiscal Year 2014**

**Prepared By: Luzerne County Planning Commission &  
Lackawanna County Regional Planning Commission  
January, 2015**

**Lackawanna Luzerne Transportation Study (LLTS)  
Metropolitan Planning Organization (MPO)  
Annual Report/Listing of  
Federally-Obligated & De-Obligated Projects**

**FFY 2014 (October 1, 2013 – October 1, 2014)**

**LLTS MPO**

The LLTS MPO is the federally-mandated organization through which federal transportation funds are distributed, planned, programmed and invested in Luzerne and Lackawanna Counties.

**Federal Transportation Funding**

The source of federal transportation funding for MPOs, also known as Public Law (PL) funds, is a one percent set-aside from certain funds authorized in United States Code 23 – Highways. The PL funds are to be used for developing Long Range Transportation Plans (LRTPs), Transportation Improvement Programs (TIPs), and the transportation planning process that goes into developing those plans/programs.

The amount of funding is set by Congress via a multi-year transportation bill which gives the United States Secretary of Transportation permission to *authorize* funding for MPOs across the country through the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). Another step is needed to release the authorized funds. This is done via an appropriations act which sets the amount of funds, out of the total funding contained in the transportation bill, which can be used for MPO planning.

The funding is divided among the states based on the ratio of urbanized-area population in individual states to the urbanized-area population of the country. (Urbanized population figures are derived from census data).

In Pennsylvania, the funding is allocated via an agreed-upon formula developed by the Pennsylvania Department of Transportation (PennDOT) and representatives of MPOs and Rural Transportation Planning Organizations (RPOs) known collectively as the “Planning Partners”.

Once funding has been appropriated, the funds can be used by MPOs for projects. When this occurs, funding goes from being “authorized” to being “obligated”. Obligation is defined as being the “commitment by the federal government to pay, through reimbursement to the states, the federal share of the eligible cost of a project.”

The current transportation bill is called Moving Ahead for Progress in the 21<sup>st</sup> Century, or MAP-21. In MAP-21, Congress authorized a total of \$118 billion in transportation funds. Of that total, Pennsylvania receives approximately \$1.6 billion every year for the life of the bill (2 years in the case of MAP-21). The LLTS MPO received approximately \$288,211,032M for Highway/Bridge projects listed on the 2015-2018 Transportation Improvement Program, averaging about \$72M per year.

### **Annual Obligation Report**

As in past transportation bills, MAP-21 requires MPOs to publish an annual report on the projects, broken down into phases, for which funding has been obligated during a particular federal fiscal year. The bill states:

“An annual listing of projects, including investments in pedestrian walkways and bicycle transportation facilities, for which federal funds have been obligated in the preceding year shall be published or otherwise made available by the cooperative effort of the state, transit operator and metropolitan planning organization for public review. The listing shall be consistent with the categories identified in the TIP.”

During FFY 2014, the LLTS MPO obligated a total of **\$69,031,259.02** for 104 *phases* of 95 projects. The 104 phases were divided into the following eight funding categories:

- Rail & Highway -4 projects totaling \$93,500 (.13% of the obligated total)
- Safety - 6 projects totaling \$4,944,979 (7.2% of the obligated total)
- Federal Bridge – 25 projects totaling \$10,466,723 (15% of obligated total)
- Congestion Mitigation Air Quality (CMAQ) – 5 projects totaling \$1,331,576 (19% of obligated total)
- Federal Highway – 31 projects totaling \$44,684,686 (64.8% of obligated total)
- Enhancement - 9 projects totaling \$206,721 (.29% of obligated total)
- Urban – 13 projects totaling \$7,303,074 (10.68% of obligated total)
- Special Funding – 2 projects totaling \$0 (0% of obligated total)

### **DE-OBLIGATED PROJECTS:**

In addition to funding being obligated for projects, funding is also de-obligated from projects throughout the year. The following conditions necessitate the de-obligation of funds:

- Bids on a particular project come in lower than the estimated cost; the difference between the estimated total and the actual bid is returned once a bid has been accepted;
- Advanced Construction (AC) projects are ones in which the contractor pays for the project up front and is then reimbursed at the end of the project; in this situation, funds are obligated for the project in the same way they are for every project; when the contractor agrees to the AC process, those obligated funds have to be de-obligated because the contractor is paying for the project up front;
- When a project phase is completed, the remaining funds designated for that phase must be de-obligated before those funds can be obligated for another phase;

- After a project has been completed and all the bills are paid, any remaining funds must be returned to the federal government

In 2014, the LLTS MPO de-obligated a total of \$7,528,826.64 for 94 phases of 81 projects. The projects were divided into the following eight categories:

- Rail & Highway – 4 projects totaling \$36,109 (.47% of total)
- Safety – 4 projects totaling \$337,303 (4.66% of total)
- Federal Bridge – 24 projects totaling \$1,525,414 (20.2% of total)
- Congestion Management/Air Quality – 6 projects totaling \$447,584 (5.9% of total)
- Federal Highway – 18 projects totaling \$3,727,227 (49.5% of total)
- Enhancement – 6 projects totaling \$1,022 (.67% of total)
- Urban – 10 projects totaling \$1,160,301 (15.4% of total)
- Special Funding – 9 projects totaling \$243,867 (3.2% of total)

### **Funding Class Descriptions:**

***Rail & Highway Funds:*** Most commonly used for grade crossing projects.

***Safety Funds:*** Used for roadway design features or hardware, such as guiderails, rumble strips, etc., that help reduce crashes or minimize their severity.

***Federal Bridge Funds:*** Used to repair, rehabilitate or replace eligible bridges.

***CMAQ Funds:*** Used for projects that help reduce traffic congestion and thereby improve air quality; includes intersection improvement projects such as new signals, signal re-timing or synchronization, creation of turning lanes, etc.

***Federal Highway Funds:*** Used to repair, rehabilitate, or re-surface eligible roadways.

***Enhancement Funds:*** Used for projects which provide access for pedestrians, bicycles, and other non-motorized forms of transportation; includes off-road trails or designated on-street bike/pedestrian lanes.

***Urban Funds:*** These funds are available to MPOs that are classified as Transportation Management Areas (TMAs) due to having an urbanized population of 200,000 or more. They are a versatile category of funds that can be used for resurfacing, highway construction, safety, and enhancement projects, and can also be flexed to fund transit projects.

**Special Funding:** Funds earmarked for specific projects by members of Congress allocated under prior transportation bills. (Map-21 does not contain any earmarked funds.)

All of the de-obligated projects are described in the following table according to the following categories:

Project Funding Class

MPMS Number (MPMS stands for Multi-modal Project Management System. It is an inventory of Highway/Bridge and Rail/Freight projects that contains information about project phase milestones, funding, and status).

Short Project Title

Project Phase: PE (Preliminary Engineering); FD (Final Design); UTL (Utilities); ROW (Right Of Way); CON (Construction)

County

State Route (SR) Number

Amount of Obligated Funds

**Abbreviations Used in Short Project Titles:**

Ov – Over	RR - Railroad
Emer or Emg – Emergency	Ped - Pedestrian
Brg – Bridge	Tr. - Trail
Hwy – Highway	D&H – Delaware & Hudson
Imp – Improvement	D&L – Delaware & Lackawanna
Intersect – Intersection	
Net – Network	ELRS – Edge Line Rumble Strips
Pav – Pavement or Paving	LEE – Tropical Storm Lee
SRTS – Safe Routes To School	
BETT – Betterment Project (Roadway Rehabilitation – includes more than paving, but less than reconstruction)	
Group 4-11 FP 1 – Group refers to several roads; 4-11 refers to District 4-0 in FY 2011; FP refers to federal paving project	
4-09 SIP6 (ERP) – District 4-0 in 2009 State Improvement Program Emergency Recovery Program
